The company noted above will provide ASI a static IP address and broadband connectivity attached to an IP camera acceptable to ASI. (The approved camera list is found at www.advantagesecurityinc.com/RemoteRecording.html.) The camera will be motion activated and deliver video to the ASI's security operations center where it will be recorded at the recommended CIF quality at 2 to 3 frames per second (depending on network traffic).

As required by the State of Colorado, ASI will actively record and archive a minimum of 72 hours of video.

For this service, the above company accepts the following selected service:

Standard Service — \$35 a month

- Offsite storage of a minimum of 72 hours of motion-prompted video captured from the IP camera placed in or viewing the security room.
- When requested by client or the authorities, preparation and distribution on DVD or other medium of the captured video. More than one incident per week will incur an additional charge of \$35 per incident.
- Health Check – should the ASI network monitoring services determine the network is down, an automatic email notification will be sent to one email address designated by the client.

Premium Service — \$45 a month

• **All services in the Standard Service.**

- Health Check – Should the network be recognized as being down, automatic email notification to up to three email addresses plus 24/7 live agent calling notification to up to three phone numbers provided by client.
- One video investigation and report per month (Standard rate is \$75 per incident.)

This agreement is for one year and automatically renews thereafter unless notification of cancellation is provided and confirmed in writing by either party.
